

SUSTAINABILITY POLICY

Sustainability is a process of ensuring the wise use of all resources within a framework in which economic, environmental and social factors are integrated and balanced. This means improving the quality of life both now and for generations to come.

Campbell & Kennedy recognise that sustainability is a local, regional, national and global responsibility. The company will endeavour to meet its commitment to sustainability through the services it provides and in the way it operates as an organisation.

The responsibility for this policy and its implementation rests with the management and all employees, who are personally committed to its success. Management teams have a key role in understanding and leading this work.

Aims of the policy

Campbell & Kennedy will:

- Set best practice standards;
- Meet and surpass requirements of environmental legislation targets, at a national, regional and local level;
- Take account of the impact on future generations when making decisions;
- Encourage employees to incorporate informed sustainability perspectives within their work;
- Operate in ways that balance social and economic impact and minimise any adverse impacts to the local community;
- Develop sustainable procurement procedures within all elements of the supply chain;
- Encourage repair, reuse and recycling ahead of the responsible disposal of surplus materials, and minimise waste generation;
- Maximise the efficient use of energy and materials;
- Increase the use of renewable resources;
- Take positive actions promoting continual improvement in sustainability performance;
- Set and achieve clearly defined sustainable development objectives and targets;
- Develop the capacity of staff to promote the understanding of the principles and practice of sustainability;
- Set indicators to measure progress.
