

CK Campbell & Kennedy

Energy

Campbell & Kennedy's MCS accredited Energy Division delivers industry-leading solutions for an array of clients including local authorities, housing associations and private businesses. CK Energy works closely with you to produce additional revenue streams by generating renewable energy, reducing and intelligently optimising energy consumption and reducing carbon emissions.

Using a proven range of technologies such as PV, CircoSense, LED lighting and more; CK Energy are able to provide bespoke energy solutions for each client and individual property.

With regional offices throughout the UK and a fleet of fully qualified, professional engineers, CK Energy can manage the entire process from feasibility study, design, installation and commissioning to long term monitoring.

Overview

Leading energy experts in:

Education

Social Housing

Ground Mount

Commercial

New Build

C&K have delivered a high standard of workmanship and attention to detail. We were particularly impressed with the interaction with our residents when explaining the operation and benefits of solar panels.

Eric Owens, Asset Planning Manager
Ealing Council

Education

We are experienced in the education sector having installed PV, CircoSense and/or LED to over 60 schools to date. A CK Energy solution can:

- be an educational tool for practical learning
- protect your organisation against rising energy costs and generate additional income
- help meet energy targets and building energy efficiency regulations

Social Housing

C&K has a wealth of experience in working with social housing providers and delivering first class customer service to both tenants and clients. A CK Energy solution can:

- help towards fuel poverty reduction
- provide health and economic benefits for residents
- provide substantial carbon reduction
- generate local economic benefits

New Build

CK Energy systems generate, reduce and intelligently optimise energy usage, which reduces costs and energy consumption and helps new build properties to be more sustainable. A CK Energy solution can:

- provide long term economic benefits for the building owner and occupier
- help meet the required BREEAM rating
- ensure the building achieves a high scoring Energy Performance Certificate (EPC)

Commerical

CK Energy has a wealth of experience installing solar and similar technologies to public sector buildings throughout the UK, including schools, offices, universities and more. A CK Energy solution can:

- save money on energy bills and generate additional income
- help meet carbon reduction targets
- display your commitment to the environment, your clients and community

Ground Mount

Optimising available land to install a solar PV system generates various benefits for numerous clients. A CK Energy ground mount system:

- can protect your organisation against rising costs in a competitive market
- can provide savings on energy bills
- increases the value of your property
- may be suitable for additional revenue streams via Demand Response and/or similar opportunities

Finance

We have substantial experience in working with public and private sector clients on energy projects varying in both nature and scale. C&K is a member of the Financial Conduct Authority and is completely impartial regarding funding options. We work with organisations to explore all available models and enable clients to use their own criteria to establish a cost/benefit analysis including a potential returns and finance study.
