

CK Campbell & Kennedy

Fire

Overview

Campbell & Kennedy make the complex requirements of fire safety legislation incredibly straightforward, from design, installation, commissioning and maintenance through to monitoring and training.

We are members of the Institute of Fire Engineers and all our engineers are BAFE and FIA trained. All work is carried out to the latest British standards and we have the infrastructure to cover all types of premises.

With national coverage, we are committed to ensuring that our customers receive the best quality of services and professionalism.
